

JHERED MIGUEL C. REPUBLICA

+63 969 294 6559 | jheredmiguelrepublica14@gmail.com | Portfolio: jhered.me | Github: [red-sakai](https://github.com/red-sakai)

SKILLS

Core Backend Skills: Python, JavaScript, TypeScript, MySQL, PostgreSQL, RESTful APIs

Frameworks & Technologies: Next.js, React.js, Flutter, Node.js, Express.js, Flask, Odoo

Cybersecurity & Security Tools: Wireshark, Wazuh, Nmap, OpenEDR, OpenVAS, OWASP ZAP, Snyc

Cloud Platforms: DigitalOcean (IaaS, DBaaS/BaaS), Supabase, Google Cloud Platform

DevOps & Development Tools: Git, GitHub, Docker, CI/CD Pipelines, GitHub Actions, Postman, Jest, Playwright

Also Familiar With: GitOps Workflows, DevSecOps Workflows, Secure SDLC Practices, ERP Development Systems

EXPERIENCE

Application Security Engineer

Agama

April 2026 - Present

Manila, Philippines

- Designed and developed secure software solutions, including web applications, mobile applications, and games, while applying secure coding practices throughout the **software development lifecycle**.
- Conducted application security assessments by identifying vulnerabilities through manual testing, performing network reconnaissance with **Nmap**, and validating exposed services to **reduce potential attack surfaces**.
- Strengthened application security by integrating **Snyk** for continuous dependency and repository vulnerability monitoring, remediating identified issues through package upgrades, security hardening, and secure configuration improvements.

Software Engineer Intern

Achieve Without Borders

June 2026 - August 2026

Makati, Philippines

- Collaborated with the Cloud Infrastructure Team to develop, test, and deploy custom **Odoo ERP** features for multiple clients, delivering scalable business solutions using **Python**, **PostgreSQL**, and **Docker**.
- Engineered and optimized backend workflows by developing **custom Odoo modules**, implementing client-specific business logic, and refactoring existing code to **improve performance**, maintainability, and reliability.
- Diagnosed and resolved complex ERP automation and performance issues by identifying root causes, **optimizing automated workflows**, and implementing fixes that improved system stability and operational efficiency.

PROJECTS

Rudeus | Proxmox VE, Jellyfin, Pi-hole, pfSense

January 2026 - Present

- Designed and deployed a self-hosted homelab infrastructure using **Proxmox VE** to manage virtualized services, monitor system performance, and optimize resource allocation across multiple virtual machines.
- Implemented self-hosted services including **Jellyfin** for media streaming and **Pi-hole** for network-wide DNS-based ad blocking, improving network efficiency, privacy, and service availability.
- Strengthened network security by configuring **pfSense** as the primary firewall, implementing firewall rules, network segmentation, and traffic monitoring to secure internal services and reduce unauthorized access.

ADPH Registration Website | Next.js, Supabase

January 2026 - March 2026

- Developed and deployed an event registration platform using Next.js and Supabase, successfully supporting **1,000+ registrants** while maintaining a fast and responsive user experience.
- Made the event website creation and system architecture, managing both the frontend and backend infrastructure to ensure reliability throughout the registration period.
- Implemented a load-balanced deployment, enabling the platform to handle **25,000+ requests without downtime or crashes**, ensuring stable performance during peak traffic.

Lunti | Next.js, Supabase, RAG-analysis

October 2025 - December 2025

- Engineered a containerized development environment using **Docker**, ensuring consistent runtime behavior across the team and eliminating environment-related issues.
- Built the application using **Next.js** and **React.js** with JavaScript/TypeScript, delivering a scalable and maintainable web interface for **ESG** tracking.
- Utilized **Supabase (PostgreSQL)** for scalable backend services and real-time data handling, with supporting data processing and AI-driven ESG report generation.

TAPCare | Flutter, DigitalOcean

August 2025 - March 2026

- Built TapCARE using the **Flutter** framework and **Dart**, delivering a cross-platform mobile application for emergency response within the school.
- Deployed backend services and API endpoints on DigitalOcean IaaS (Droplets), ensuring reliable availability for real-time emergency alerts.
- Utilized **DigitalOcean DBaaS** for secure, scalable data storage with automated backups to support the school's emergency and clinic operations.

CERTIFICATIONS

Red Team Leaders - Certified Threat Intelligence & Governance Analyst (CTIGA)

February 2026

Demonstrates foundational knowledge of cybersecurity and information assurance concepts, including threat awareness, basic security practices, and ethical standards, aligned with CTIGA's professional development framework.

NexusCloud IT Solutions Inc. - Cisco Certified Networking Associate (CCNA) 200-301 Training Certificate

February 2026

Demonstrates practical training in networking fundamentals, including IP addressing and subnetting, VLANs, routing and switching concepts, basic network security, and Cisco device configuration, aligned with the CCNA 200-301 curriculum.

ISC² - Certified in Cybersecurity (CC)

January 2026

Demonstrates foundational knowledge of cybersecurity principles, including security operations, networking fundamentals, risk management, incident response, and governance, aligned with industry best practices for entry-level cybersecurity roles.

COMPETITIONS

1st Runner Up

December 2025

PUP Uthack ang Puhunan

- Achieved 1st Runner-Up with **Lunti**, an ESG-focused platform, and received **₱30,000 in prize winnings** during the competition.

Top 5

November 2025

PUP ICTO Technology Fest

- Achieved Top 5 with **Blockbayan**, a blockchain donation based system where it is focused for helping people who got affected by disasters, and received **₱3,000 in prize winnings** during the competition.

1st Place

June 2026

Zero Vector Hackathon

- Achieved 1st Place with **Rover**, a business centered AI-model where it can be your everyday partner to view current business statuses and received **₱3,000 in prize winnings**.

Top 8

May 2026

InnOlympics 2026

- Achieved a Top 8 finish with **eSumbong**, a mobile application that puts the user first and helps with local baranggay complaints/problems that helps the process easier.

EDUCATION

Polytechnic University of the Philippines

Sta. Mesa, Manila

Bachelor of Science in Computer Engineering

2024 - 2028

- Pasig City Scholar
- SM Scholar
- DataCamp Scholar
